

The AHA Refresher day

Date: Thursday 21th of November

Expected time: 10:00 – 17:30

Cost: DKK 750

A workshop for certified AHA users where you will learn about the latest AHA-news; the new version 5.0 and the new activities for the expanded age range including adolescents and adults!

You can also update your scoring skills, send in questions (e.g. about certain items you may find difficult), discuss how to interpret the AHA outcome and what scales to use when reporting, and discuss the concept; what is a useful assisting hand?

Content:

- Updates – the new version 5.0
- Updates – the new activities suitable for adolescents and adults
- Refresh your scoring skills – joint scoring of children
- How to use the AHA outcome for treatment planning.
- What the psychometric properties of the AHA mean for interpreting the result
- How to use and interpret different outcome scales; sum score, %-score, logits.
- How big a change is a "true" change?
- How report the AHA results for individual children?
- What is "a useful assisting hand"?
- Ongoing AHA related research and new versions

A part of the day is based on your questions. Please send in your questions in advance and you are welcome to bring a short video clip illustrating a scoring problem.

The fee includes the manual 5.0 and the electronic version of the new score form. Including tea, coffee and lunch.

The course is held in English and requires a minimum of 16 participants.

Registration deadline: 29th of September 2017
